

# FKS Series Medium Case Size

## Aluminum Electrolytic Capacitors

### High Capacitance Now Available In A Medium Case Size Of 18 x 21.5 mm!

Panasonic is pleased to announce that the revolutionary **FKS Series** next generation Aluminum Electrolytic Capacitor is now available in a NEW Medium Case Size of 18 x 21.5mm. With a capacitance range of 750  $\mu$ F to 13,000  $\mu$ F, **FKS Series** Capacitors are ideal where high capacitance current capability is being demanded by the application. The AEC-Q200 compliance of the **FKS Series** ensures that these Capacitors are meeting the most stringent quality standards in the industry. If required, Panasonic is also able to provide vibration proof variants.

#### Feature

Medium Case Size: 18 x 21.5mm

Endurance: 105°C, 5000 h

Vibration Proof Option Available

AEC-Q200 Compliant

RoHS/REACH Compliant

#### Benefit

High Temperature Lead-Free Reflow

Can Withstand Shocks of Up to 30G

Ensures High-Quality Performance

Environmentally Friendly

#### Market Sectors / Industries

Automotive

Industrial

Power Supply

Smart Meter

Robotics

#### Applications

DC to DC Converter

AC to DC Converter
