3M™ Dust Free Hose Extension Kit, 05215, 1 kit per case

3M ID 60455053151 UPC# 00051131052154 CAT# 5215

Our 3M™ Dust Free Hose Extension Kit lets operators expand their capabilities in effective sanding while keeping dust under control. This kit features a durable whip hose and adapters that convert large-hose dust control systems down to a standard 1" outside diameter vacuum hose, perfect for 3M Sanding Blocks and other 3M Dust Free tools. The hose provides a range of 20' for added versatility.

- Adapts common shop tools to large-hose dust evacuation systems
- 20' whip hose increases reach in the shop
- Adapters fit a range of systems, maximizing their use
- Standard 1" vacuum hose works with 3M Block Sanders and other sanding tools
- Helps abrasives resist loading for longer abrasive life and better value

Overview

Extending Your Range in Collision Repair

One simple kit adds so much to your collision repair capabilities – our 3M™ Dust Free Hose Extension Kit includes a durable whip hose and everything you need to adapt to dust vacuum systems that use much larger hoses. Along with the hose, the kit includes adapters that connect it to a range of dust removal equipment. These adapters convert this range of systems down to a 1" outside diameter vacuum hose that connects effortlessly to tools including 3M Sanding Blocks. The 20-foot hose also lets you sand more effectively in more places across your shop floor.

The result is longer reach, a greater range of sanding tools and capabilities and more effective use of the dust removal systems in your shop, along with greater loading resistance and longer abrasive life.

Better Science for Better Sanding from 3M

Our broad selection of sanding tools and abrasives delivers consistently professional results in collision repair. Our 3M™ Dust Free Hose Extension Kit allows you to extend the range of possibilities – and your cost efficiency – in effective, dust free sanding across your entire operation.
